

PYLEN Film-FG is the biaxially stretched film whose main material is the polypropylene. Thanks to the superior transparency and antifog properties, it is possible to show the contents clearly, and additionally, the features are effective for keeping the freshness of foods.

FUTURE

P5562 is a duplex antifog type and superior in fusion sealing properties.

USE

Vegetable packaging, Pasty product, Sushi

## General physical property of PYLEN Film-FG P5562 type

Item		Unit	P5562			Measuring method

On these data, the representative values were measured under the specialized condition (23 degrees C, 50%RH) at our company's film feature evaluation agency.

\*The inks may fall off when the printed thing becomes wet depending on the process condition.
